BRECK'S OF BOSTON

SEEDSMEN SINCE 1818
BOSTON 10, MASS.

Dear Gardening Friend:

Breck's is proud to be among the first to introduce the lovely Butterfly Glads to America's gardeners! I was fascinated by their beauty when I first saw them growing in the fields of England and Holland, during a business visit several years ago.

Last year, we offered several varieties. Gardeners were intrigued! They planted Butterfly Glads by the thousands, and reported that they were thrilled with their graceful forms and delicate colors!

This year, we have chosen the outstanding variety, Melodie, as our cover subject. I'm sure you'll want to try these . . . as, like other Glads, they are among the easiest of flowers to grow!

Look through all 76 pages of this modern Garden Guide. You'll find complete lists of Bulbs, Flower and Vegetable Seeds (many illustrated in full color), garden aids, seed starters, etc. All are top quality . . . guaranteed by Breck's . . . and many are Breck's exclusives!

We have underlined those varieties which our experts consider to be the best in their class. These varieties have been selected by actual trial, under conditions similar to those in your own garden.

Send us your order promptly . . . and get a jump on the 1961 season!

Yours for better gardens,

Luther A. Breck, Jr.

**Here's what
customers say about....
this famous sale!**

BRECK'S ADVANCE BULB SALE!

YOU, too, will be pleased...

The bulbs I ordered last year were so magnificent that they were the envy of the city! The Red Emperors and Blue Ice are almost beyond description, but my real pride and joy were the Blue Parrots and the Candelabra. The Blue Parrots were nine inches across. Magnificent — words can't describe this wonderful tulip. All but one Candelabra had 6 tulips measuring 3-3½" across! Each plant was a bouquet! Truly my greatest thrill in gardening!
N.R.C. Albuquerque, N. M.

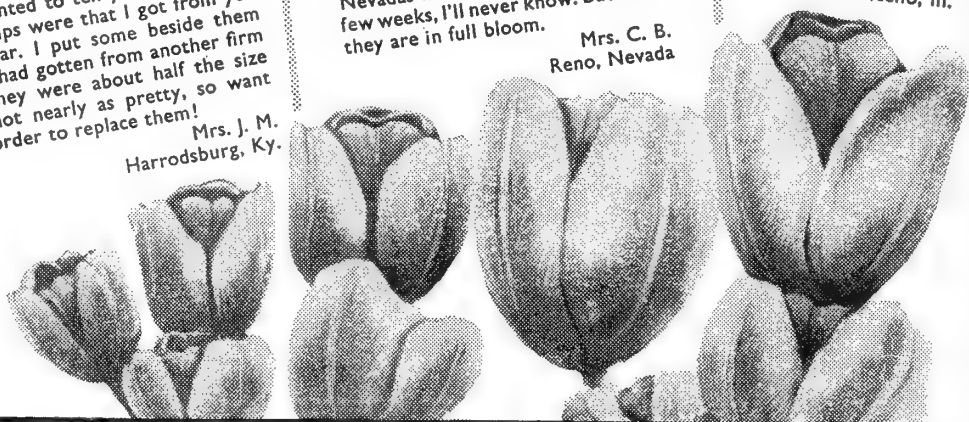

I'd like for all the world to know
How sturdy and fast Breck's tulips grow!
They are every color and every size,
A truly wonderful garden prize!
From the last week in March
They bloom each day,
Then all of April, and most of May.
They love the sun, fear not the cold,
And show their colors
So bright and bold!
My neighbors come and chat for hours,
About my lovely, lovely flowers.
"Where did you get them?"
They all chorus...
The answer is easy —
"Breck's, of course!"
I'd be without my Tulips never!
They are such a sight to behold —
Such a joy for ever!
J. K. Monohans, Texas

I must let you know that I am the proudest woman in my neighborhood! My tulip garden is the envy of every-one, and they want to know how I do it. But, of course, I tell them it takes no skill — just Breck's bulbs!
Mrs. M. C. Lafayette, Indiana

Wish you could see our yard this morning. It's full of Breck's tulips and daffodils! The daffodils are in the shadier patio, and so they bloom at the same time as the tulips. How anything could be so big and beautiful with all the weather the Sierras have handed us in the past few weeks, I'll never know. But there they are in full bloom.
Mrs. C. B. Reno, Nevada

I am immensely pleased with my beautiful tulips and hyacinths. They are indeed the most beautiful I have ever seen — anyplace! Persons who pass our home have stopped to admire them and ask where I had purchased them.
Mrs. B. R. F. Monticello, Ill.

Just wanted to tell you how pretty the tulips were that I got from you last year. I put some beside them that I had gotten from another firm and they were about half the size and not nearly as pretty, so want this order to replace them!
Mrs. J. M. Harrodsburg, Ky.

HOW TO GROW BEGONIAS

For early blooms, start indoors in soil or dampened peat moss in February or March. Begonias may be grown in boxes or flats, but the Fiber Pots or the Begonia Starter Sets (see p. 54) are ideal.

Just set the tubers into the soil or peat moss, water side up, and covered not over $\frac{1}{2}$ -in. Hold sparingly until they sprout, increasing the amount as leaves appear. Choose a window or porch with good light, temperature from 60 to 70 degrees.

After a few weeks, plants will have extensive root systems and may be transplanted into 8-in. pots (p. 7). Set outdoors after all danger of frost is past. Choose a shady spot sheltered from strong winds.

FLAMINGO CALADIUMS

1. Caladiums will do well outdoors where summer daily temperatures average 70° or more. This includes most of the United States except the extreme northern section.
2. They are very much at home in deep shade . . . where little else will grow . . . providing masses of gorgeous color to brighten dark corners. They do well in semi-shade and also in full sunlight. When grown in full sun, they should not be allowed to become dry.
3. Bulbs may be started indoors as early as February 15 and transplanted outdoors when weather is settled warm. They do not like cold weather. Caladiums, of course, do well in pots or tubs used as patio decorations or in window boxes.
4. Bulbs planted directly into the garden when soil is warm (after Memorial Day in the latitude of Boston) will produce magnificent plants in less than a month!

Plant Caladiums generously—for colorful accents—to brighten shady corners! Foliage may be cut for arrangements. Plant them 'round your summer home (they require little or no care) and be the envy of your neighborhood!

Bird Supplies
Now
Audubon Society
Approved!

You can be assured that all Breck's bird supplies are the finest ever made—recently tested and highly approved by the well-known Audubon Society of Massachusetts! Breck's healthful, well-balanced bird seed formulas are most widely acceptable for all birds, perfected to attract more varieties of wild life to your feeders. The grateful birds will thank you!

Breck's Country Life "MOOSE HILL" WILD BIRD FOOD

Our own famous mixture—for years the choice of experts—is now the officially approved "Moose Hill" mixture of the Massachusetts Audubon Society. Mixed to strictest specifications, it contains nothing but the choicest re-cleaned ingredients and, because it contains no "filler" seeds, it will be eaten to the last seed. All seeds are not eaten by birds that normally inhabit your garden. Years of testing have shown us which seeds are most desirable. Sunflower and Peanut Hearts are included in extra generous quantities. Millets and other proven favorites make up the balance, plus the exact percentage of grit needed to aid digestion. Use Country Life in your feeders and watch the difference! More birds will use them . . . and there will be no waste.

The Daintiest Tulip Grown!

Peppermint Sticks

1599 Dainty, miniature Peppermint Stick Tulips — a rare and unique wild species, discovered originally in Asia Minor — have smaller blooms than standard Tulips. They are just right for edgings, rock gardens or in front of evergreens and are so attractive, you'll wonder why everyone doesn't grow them.

Each long, pointed petal shows a wide triangle of bright, cherry-red on a white background. Inside is a delicate, satin-violet with a striking, purple-violet base. The whole effect is one of soft loveliness that resembles fine bone china, yet every flower is strong and long lasting. Stems are 12-14 inches tall.

Peppermint Stick, being a wild Tulip, should be planted in a permanent location, where it can grow and multiply for years. Even the bulbs do not look like ordinary Tulips — being quite small and wearing fleece-lined overcoats — but they should be planted 4 inches deep in a sunny location.

Hardy! **SUB ZERO** *Everblooming* **ROSES** 3-Way

- Actually withstands 15° below zero!
- Grow them tall or grow them short!
- Big, brilliant blooms all Summer long!
- Guaranteed by Breck's for 5 years!

Here's something *NEW* and *DIFFERENT* in Roses! A three-way Rose that lets you change your landscape ideas any time. Either way, you get big, colorful, fragrant blooms all summer long. Grow them as Hybrid Teas . . . as big specimen shrubs . . . or as everblooming climbers. Plenty of flowers the first year and many, many more after they are established.

Hardy too! Sub-zero Roses have survived 35° and 40° below zero — as low as 15° below zero with no protection whatsoever.

← Here they are growing as everblooming climbers.
